Nobel Biocare™

Greater Manchester Digital Dentistry Study Club

Introduction evening
11 December | The Stanneylands, Wilmslow

Meet our speakers

We are thrilled to invite you to meet our five distinguished speakers at the Stanneylands Hotel, Wilmslow, on Thursday, 11 December at 18:30. This special evening will provide an opportunity to network, gain insights from industry leaders, and celebrate the start of our transformative series.

About the series

Our Digital Dentistry Study Club is designed to empower clinicians with cutting-edge knowledge and practical skills for implementing digital workflows in everyday practice. Across five sessions, you'll explore the latest innovations in diagnostics, treatment planning, orthodontics, implant navigation, and full-arch rehabilitation—all guided by leading experts in the field.

18 FEBRUARY

Creating the Digital Patient - with Hitesh Panchal

- Introduce the concept of a fully digital patient record and its role in modern treatment planning.
- Demonstrate intraoral scanning, CBCT integration, and data management for accurate diagnostics.
- Highlight benefits of digital workflows for patient communication and case acceptance.

22 APRIL

Treatment Planning - with Billal Arshad

- Explore digital tools for comprehensive treatment planning across restorative and implant cases.
- Show how to integrate prosthetic-driven planning with surgical considerations.
- Discuss risk assessment and predictability using virtual simulations.

10 JUNE

Ortho Digital Treatment - with Daz Singh

- Present digital orthodontic solutions and their synergy with restorative workflows.
- Explain how digital planning improves efficiency and patient outcomes in orthodontics.
- Review case examples demonstrating interdisciplinary collaboration.

9 SEPTEMBER

Own the Zone: X-Guide® Implant Placement & Digital Temporisation - with Sharif Khan

- Introduce participants on dynamic navigation systems for precise implant placement.
- Demonstrate digital temporisation techniques for single units and bridges.
- Emphasise workflow integration for reduced chair time and enhanced aesthetics.

9 DECEMBER

Digital All-on-4® with X-Guide® and OnX Tough 2 Printed Full Arch Temporary Bridge - with Richard Brookshaw

- Provide a step-by-step approach to full-arch rehabilitation using digital protocols.
- Showcase the role of X-Guide, SprintRay and OnX Tough 2 in achieving immediate loading.
- Discuss clinical tips for managing complex cases and ensuring long-term success.

Outomes

By the end of the series, participants will:
- Understand the complete digital workflow from diagnostics to final restoration.
- Gain confidence in understanding navigation systems and 3D printing for advanced cases.
- Be equipped to implement digital solutions that enhance efficiency, accuracy, and patient satisfaction.
